

SOUND BLASTER PLAY! 4

Communicate Smarter – Auto Mute and Two-way Noise Cancellation for Conference Calls

The Sound Blaster PLAY! 4 comes with our all-new SmartComms Kit, a suite of smart communication features, including VoiceDetect that mutes and unmutes your microphone automatically, and the two-way NoiseClean features that allow you to hear and be heard clearly during online calls. With Sound Blaster PLAY! 4, it is the easier and smarter way to communicate..

AUTO MIC MUTE AND UNMUTE WITH VOICEDetect FEATURE

Avoid fumbling over your mic mute button in a video call with our VoiceDetect feature, which mutes you automatically when you stop speaking, and unmutes you instantly as you start speaking. If you need to talk to someone on the side, the Sound Blaster PLAY! 4 also comes with a direct mic mute button for you to mute/unmute yourself for quick and easy access.

TWO-WAY NOISE CANCELLATION WITH NOISECLEAN FEATURES

Reduce unwanted background noise during an online work call on both ends of the conversation with the NoiseClean features. NoiseClean-out works to remove noise on your end by suppressing your static background noise (e.g., vacuum cleaning), so you can be heard clearly by the others, and it doesn't stop there. NoiseClean-in does the same for your co-workers, so you can hear their incoming voices clearly in your headphones—minus their noise.

SUPER EASY TO SET UP, JUST TOGGLE ON

Plug in the PLAY! 4 to your PC, turn on the SmartComms Kit's suite of smart communication features in the Creative app on Windows PC, and gain control over the VoiceDetect's auto mute and NoiseClean's two-way noise cancellation features. The software also comes with Sound Blaster Acoustic Engine, our suite of industry-leading audio processing technologies like Surround immersion, as well as CrystalVoice that enhances voice clarity during video calls.

DUAL BUILT-IN EQ MODES FOR ENHANCED AUDIO

Enhance your sound further with the Bass Boost and Dynamic EQs via the EQ button located on the Sound Blaster PLAY! 4. Hear deeper, richer bass with Bass Boost EQ, or expand your soundstage with Dynamic EQ. At the heart of it all, Sound Blaster PLAY! 4 is powered by a 192 kHz / 24-bit resolution, 110 dB DAC, and delivers high-quality audio that is clearer and richer than the default audio on your computers and laptops.

PORTABLE, CONVENIENT, AND WORKS WITH ALL HEADPHONES AND HEADSETS

This tiny USB-C audio adapter is no bigger than a pen, and weighs just 8.3g (0.29 oz) so you can carry it in your pocket easily. Plus, the PLAY! 4 works with any of your 3.5 mm headphones and headsets, including those that comes bundled with your mobile phones, alongside with your laptops or desktops. For those with USB-A devices, we have also included a USB-C to USB-A converter so you can get started immediately.
