- Built-in Lightning and USB-C cables

- Quick Charge 3.0
- 6 types of protection
- Charges 3 times faster

Get the ultimate power bank that's tailored to your needs. Canyon PB-1010 is fully loaded: there's Power Delivery, Quick Charge 3.0, and Smart IC with six types of protection. It features a dual USB-C and MicroUSB power input – even your older cables might be put to use here. Both ports are capable of up to 18W, thus reducing the charging time. Quite handy if you're always on the go. What about the outputs? Oh, there are plenty: two ports and two built-in cables. The USB-C output port is a 20W PD, and USB-A can deliver 22.5W of juice. Now, the cables! Two cables are designed with usability in mind and won't just hang there: they seamlessly fit into the notches on the body. One cable is USB-C, and the other is Lightning. Back to the Smart IC technology – it detects your device, optimizes voltage, and safeguards against short circuits and overheating. Being lightweight, this 10000mAh power bank can charge your phone up to three times faster. It's a reliable power source fitting into your pocket.
