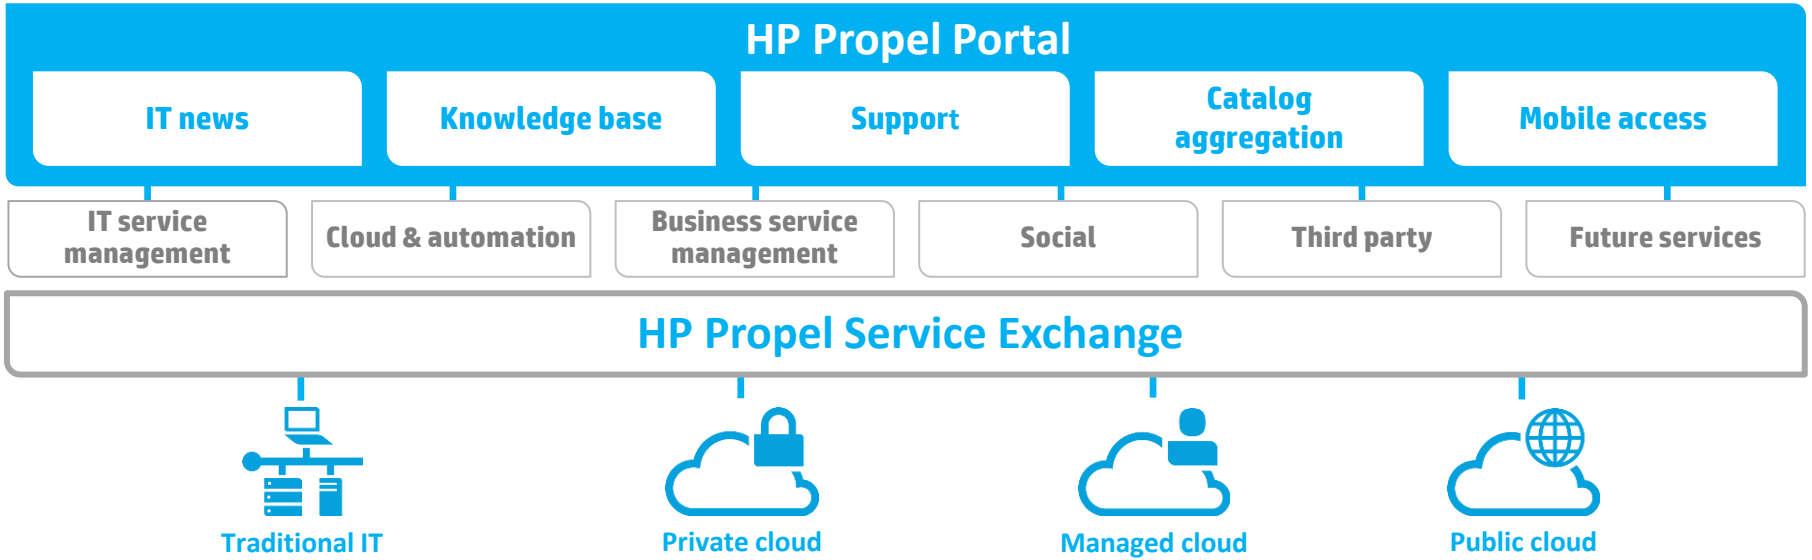
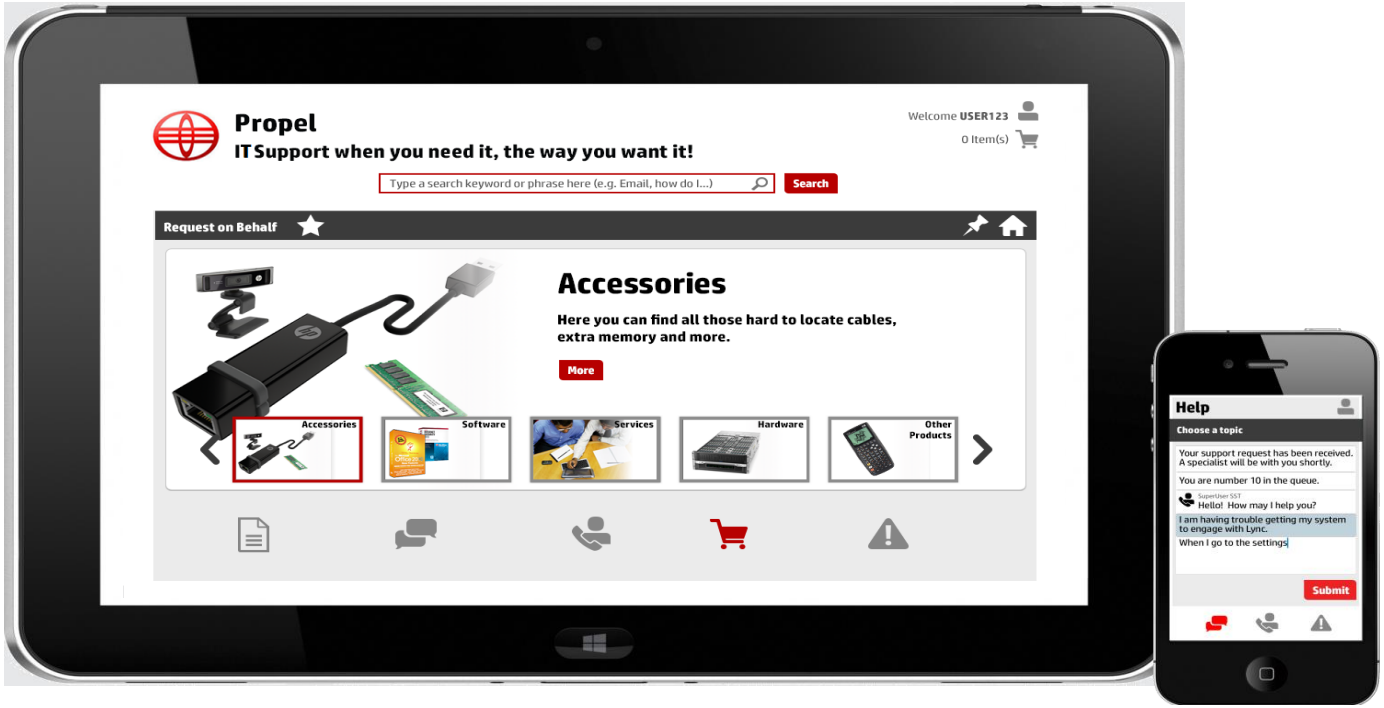
Introducing the HP Propel open framework

Transform IT into a true service broker



Introducing the HP Propel open framework

The one-stop shop for enterprise employees



E.ON and HP Propel

HAVEn - The leading Big Data platform

Simplified ways of doing business

“ As our business becomes more complex, we believe that open framework and consumerized user experience is central to enabling our self-service strategy aimed to improve performance and cost control,” said Edgar Aschenbrenner, chief information officer, E.ON. “The implementation of HP Propel service portal is a key step towards transforming our IT organization into a strictly service oriented multi-supplier environment.”

Forrester Research rates HP as the sole leader in private cloud provider evaluation

“HP stands out from the crowd by providing a clean and navigable interface that wraps substantial breadth and depth of capabilities into the fewest number of interfaces”

- The Forrester Wave: Private Cloud Solutions, Q4 2013

Designed for answers from the very first line of code: HP Vertica

Columnar storage and execution	Achieve best data query performance with unique Vertica column store
Clustering	Add resources on the fly with linear scaling on the grid, commodity hardware
Compression	Store more data, provide more views, 90% less storage required
Continuous performance	Query and load 24x7 with zero administration

Database design
Automated performance tuning

Advanced analytics
Time-series, geospatial, click-stream and an SDK for more

facebook

Facebook and Vertica

Facebook has benefited greatly through the use of **HP Vertica** in maximizing the lifeblood of their company: **Data**. "*The thoughts and ideas that come from our workforce are what drive us*," Campos stated.

"*We have achieved, with **Vertica**, more of a balance [between scale and speed] that allowed us to build from a month to a year of data storage and review*," Campos said.

Facebook's speed has seen an increase where they are able to update once per hour. "*Analytics that used to take minutes or were unable to complete are now things we can do in seconds.*"

Tim Campos, CIO Facebook
