**8 port USB-C Hub DS-15**

# MAIN TEXT

This hub is one of the few capable of reading 4 types of cards. It has built-in slots for SD, SDHC, SDXC, and TF cards. In addition, you can connect a monitor, headphones, or speakers via a 3.5 mm mini-jack. It has two ports for peripheral devices – USB-A 3.0 and USB-A 2.0. The up to 100W USB-C PD charging port allows you to charge your connected device at optimal speed. You can connect directly to the network via Gigabit Ethernet using the hub. In addition, the device is compatible with Google Media Player Chromecast. The lightweight and durable housing of the hub is made of aluminum, which prevents interference in signal transmission. You will not need any additional software or special skills to use the hub. Compact and functional solution for many tasks!
