

Smart Dock USB 3.0

Universal docking station for fast and easy set up of your working environment

With the Smart Dock USB 3.0 by DICOTA you can turn your laptop or tablet into a fully-equipped office workspace in just seconds. Thanks to the one-touch system, you can connect monitors, USB accessories and external storage disks to your device with just one cable. This means you can benefit from the flexibility of a mobile device without having to relinquish the comfort of a permanently installed workspace. With the Smart Dock USB 3.0 you can clean up your desk and do away with annoying cables.

The five USB ports allow you to connect multiple peripheral devices to your notebook, such as a keyboard, mouse, printer or external hard disk drive. Enjoy the benefits of USB 3.0 SuperSpeed technology for top data transfer speeds. The universal docking station offers two types of graphics output (HDMI & DVI-I) for monitors and televisions. The integrated graphics chip set supports full HD+ resolution and does not impair the performance of your laptop/tablet thanks the premium-quality graphics controller. The whole package is rounded off with a powerful Gigabit Ethernet port as well as audio input and output. The DICOTA Smart Dock includes an integrated dual card reader for SD and micro-SD cards. The Smart Dock can easily be turned into an easy backup solution by using your backup software of choice together with an external data carrier. Use automated backups every time you connect your device to avoid losing any important data – protect your world.
