The PlayStation 5 is a powerful platform capable of running amazing games. With all that power comes heat, and you probably noticed how hot your console gets during those intense gaming sessions. Well, we've got just the thing to keep your console cool as a cucumber: the Canyon PS5 Cooling Stand.

This device has a built-in high-speed fan with three speed settings. That'll keep your PS5 running smoothly and prevent overheating, thus extending its lifespan. We included the Type C cable of the right size to power this cooling system from the console's USB C port. The stand supports simultaneous charging for two original PS5 controllers, and an LED light indicator will show the charging status. There's another USB-A port to charge... well, whatever you want!

The stand also has adjustable RGB backlighting, because who doesn't love some cool lighting effects? There's a game disc storage for six keep cases, dust-proof game accessory storage on top, and a headset holder. Phew, that's a lot of features!

So if you want to keep your PS5 in great shape, this cooling stand is a must-have. Think of all the extra hours of gaming without any pesky overheating issues. It's a win-win. Grab your cooling stand today!

Gaming disc storage

Headset holder

USB-hub

Cooling fan (3 levels of speed)

Smart RGB-indicators of charging

Console lifespan extension

BUILT-IN HIGH-SPEED FAN

The high-speed fan is capable of doing 5000 RPM to properly remove the heat from the console. Select one of the three fan speed modes for optimal and quiet cooling.

TYPE C PORT

Power it up with a Type C cable that comes in the package. It has the perfect length to connect the cooling stand to your console's Type C port – no mess with hanging wires.

SIMULTANEOUS CHARGING FOR TWO PS5 CONTROLLERS

There are two charging slots for PlayStation 5 controllers with a charging indicator. Red light while charging, blue once fully charged, and other modes.

A close-up, angled view of a dark, textured device bezel. A bright, glowing cyan light strip runs diagonally across the frame. To the left, a blue light strip is visible. Several circular buttons are visible, some with small colored dots (cyan, blue, green) above them. Labels like 'FAN', 'RGB', 'DC IN', and 'USB OUT' are visible on the bezel. The background is a dark, perforated surface.

RGB BACKLIGHT

The device's bezel rocks a breathing RGB backlight. Adjust the color and mode to your liking, or turn it off completely... But it does look great.

TIDY STORAGE AND SPACE SAVING

The Canyon cooling stand has everything you need for storing your accessories: a disc storage for 6 keep cases, a dust-proof compartment on the top for your remote and other accessories, and a headset holder. There's another USB 2.0 port to charge whatever you might need.
