Gaming mouse GM-321

CND-SGM321

5291485009908

Canyon Shadder will make your opponents shudder from the magnitude of your skill. All-black body with RGB backlight shines in the dark of a battleground.

There are six programmable buttons, six sensitivity levels, and six backlight effects modes. Delightfully devilish! Thanks to the Canyon software, you can adjust all of this to your taste. Don't forget to assign macro functions – Shadder supports this, as well.

This mouse has an Instant 725F sensor on board, with a maximum sensitivity of 7200 DPI. The buttons are designed to withstand 5 million clicks, and the braided cable will serve you till the end of time.

## FEATURES
