The DCS-5000L Wi-Fi Pan & Tilt Day/Night Camera provides a range of features to help you effectively monitor large areas of your home or small office at all hours of the day. The pan/tilt function allows the camera to patrol a wide area and built-in microphone allows you to hear, while the built-in night vision provides around the clock surveillance regardless of the lighting conditions. Wireless connectivity means there is no need for additional cabling, allowing for flexible placement and hassle-free installation.

Peace of Mind With 24/7 Monitoring

The DCS-5000L is a standalone wireless surveillance camera that requires no special hardware or software and can run independently, even without a PC. Send e-mail notifications with snapshots or video clips whenever motion is detected using just the DCS-5000L and an Internet connection. You can customise areas of the video image to monitor for motion, allowing you to effectively monitor entryways or restricted-traffic areas. Night time monitoring is also possible thanks to built-in infrared LEDs which allow for viewing of up to 8 metres in complete darkness, enabling round-the-clock monitoring of your home or small office.

Sharp Image Monitoring from Different Angles

By providing you with sharp, responsive pan/tilt movement and digital zoom, the Wi-Fi Pan & Tilt Day/Night Camera gives you full control over your surveillance. You can quickly scan a wide area from a variety of angles, and 4x digital zoom lets you zoom in on specific areas for more detail. The DCS-5000L can also be set to move to specific preset positions, allowing the camera to focus on particular areas of interest within the surveillance area.

Wired and Wireless Connectivity

Place the DCS-5000L anywhere in your home or small office with the flexibility of either wired or wireless connectivity. Install the DCS-5000L anywhere within range of your existing wireless network, without the need for additional network cabling. Wireless connectivity gives you the flexibility to move the camera from place to place should your surveillance requirements change.

mydlink™: the easiest way to setup up your camera and monitor your home

Connecting a camera on your network and accessing it has traditionally required complex configuration. mydlink™ makes it easy to access your camera from wherever you are, whenever it's convenient for you. Using the free mydlink™ Lite app for iOS and Android smartphones and tablets, you can connect and setup your mydlink™ camera without turning on a computer. A step-by-step guide has your camera up and running in a matter of minutes. Through the mydlink™ Lite app, you can set up a free mydlink™ account which allows you to view and manage your camera from any Internet connected computer. If you have more than one camera, you can add it to your existing mydlink™ account and watch all your cameras from a single location.

Accessing your cameras on the go is easy too. Just download the free mydlink™ Lite app for your iPhone or Android device and you can quickly and easily view your camera feed from anywhere with a wireless or 3G/4G LTE connection. Thanks to this app, you can monitor on-the-go even if you don't have access to a computer.

If you have a mydlink™-enabled Cloud Router, setting up and configuring your DCS-5000L is a 1, 2, 3, thanks to Zero Configuration. Simply connect your camera to its power adapter and then connect your camera to your Cloud Router with an Ethernet cable - the camera will automatically be added to your account.

mydlink™ Lite App

With the free mydlink™ Lite app for iOS, Android and Windows Phone devices you can quickly and easily monitor your home or office anywhere with a Wi-Fi or mobile Internet connection.
