

Secret 24.0" Wide (16:10)

Highly effective view protection for your PC

You are working with confidential information and want to protect private, business and customer data from prying eyes? The highly effective DICOTA privacy screen protectors offer impressively high quality, durability and are easy to attach. At the same time they protect the screen against scratches and prevent from disturbing finger prints.

The innovative Microlouver -Technology protects the screen-view from both sides (left/right). Furthermore users benefit from an effective glare protection thanks to the Anti-Glare-Mechanism of the film. Easy working – even in sunshine. The premium filter is placed on the screen fastened with small flaps at the edge of the monitor. This allows easily attaching and removing the film when needed. A practical and impactful method to ensure, that only you can view your data. Ideal for the use in an open plan office, at a customer desk or inside a classroom.
