This right-handed mouse is powered by Pixart, the world leader in durable and high-precision, sensors. The sensor was created to be applied to any surface, and 3 firm buttons of the mouse can withstand 3 million clicks. The mouse is coated with solid materials using UV Matt technology, protecting the mouse from cracks and scratches and increasing the durability of the device. A stable wireless connection provided by a 2.4 GHz USB receiver allows you to maintain uninterrupted connection, making the mouse a decent assistant for every day.
