

CREATIVE SXFI® CARRIER

Dolby Atmos® Speaker System Soundbar with Wireless Subwoofer and Super X-Fi® Headphone Holography

Creative SXFI CARRIER heralds a new dimension in Dolby Atmos® soundbar technology with built-in Super X-Fi® Headphone Holography to create a new multi-speaker cinema experience on headphones. The SXFI CARRIER carries on the engineering marvel of the award-winning Sonic Carrier which has been dubbed by industry experts as the “soundbar of the gods”.

Jointly developed by Creative and Dolby Laboratories, SXFI CARRIER has the same sound signature as the 15.2 Sonic Carrier at less than half the size and at a fraction of the price. Even with a scaled-down size, SXFI CARRIER can transform your living room to provide a full-fledged cinema experience.

When there's a need to enjoy your movies privately at night without disturbing your family or neighbors, put on SXFI THEATER headphones (optional) to enjoy the same cinematic experience as you would on the soundbar.

FIRST-OF-ITS-KIND DOLBY ATMOS SPEAKER SYSTEM WITH SUPER X-FI

With an innovative acoustics concept designed by Dolby and cutting-edge audio engineering expertise by Creative, the SXFI CARRIER collaborative effort that marries Dolby's leading surround sound technologies with Creative's electronics know-how, and integrated with our award-winning Super X-Fi technology to deliver uncompromised, full theatrical audio performance for urban homes of any size, in the smallest footprint possible

SUPPORTS DOLBY ATMOS

Delivers breathtaking, moving audio from a soundbar based on a brand new, innovative acoustics design by Dolby's experts, transporting users into the story with moving audio that flows all around you, and realistically depicting objects moving overhead, like a helicopter in a war zone, or a songbird fluttering from tree to tree; any Dolby Atmos encoded content will work on SXFI CARRIER, even streamed ones like Netflix, Apple TV, Prime Video, and more

HEAR EACH AND EVERY WORD CLEARLY

Never miss out on important on-screen dialogues which tends to get drowned out by intense audio effects and emotional soundtracks. The SXFI CARRIER is purposefully tuned to intelligently bring up the volume of the vocals and spoken dialogue, allowing you to clearly hear each and every syllable while balancing them with the emotions that other audio cues brings to the show

WIRELESS 10" COMPACT SUBWOOFER

Enjoy the same scale and drama that we all know and love from cinemas, and hear smooth, yet remarkably powerful bass reverberate through the entire room. Designed to bring seat-rumbling bass with a fuller and deeper response without overextending it, the bass reproduction of SXFI CARRIER has been expertly-tuned to deliver clean, precise, and impactful bass that you can feel, and not just at high output levels, but at low levels too

MULTITUDE OF CONNECTIVITY OPTIONS

The SXFI CARRIER features an extensive array of connectivity options, featuring HDMI eARC for high-quality, lossless audio transmission with compatible TVs, two HDMI 2.1 ports, HDR10, HDR10+, future-proof 8K passthrough, Dolby Vision Compatible, 3.5 mm jack with built-in Super X-Fi headphone holography, SXFI-out support, USB Type-C audio input, as well as Bluetooth 5.0 via mobile devices; also comes with a remote control for added convenience
