

## How to install evaluation licenses

**Check Point**<sup>®</sup>  
SOFTWARE TECHNOLOGIES LTD

**Tomas Vobruba**  
**Security Engineering Slovakia**  
**13.3.2020**

## Prerequisites

You need to fulfill following requirements:

- To be a customer of Check Point
- To have usercenter account connected with your account and products
  - <https://usercenter.checkpoint.com/>
- To have rights generate licenses
- To have gateways where to install licenses.

## **1. Generate license keys**

### **There are possible ways how to generate licenses:**

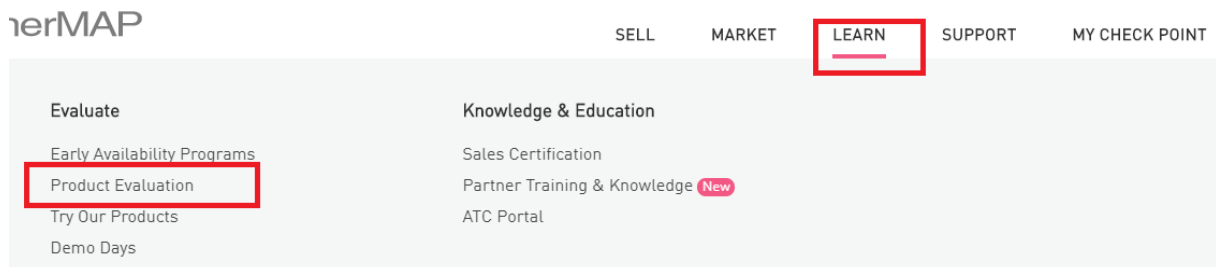

1. Generate EVAL licenses by yourself
2. Ask Partner/Disti/CP representative generate licenses and attach them to boxes by yourself

See bellow.

## 1.1. Generate EVAL licenses by yourself

In portal <https://usercenter.checkpoint.com/>

Click to section Learn/Product Evaluation

License (sk81200) - Generate a 30 day evaluation license via your user center account and license the appliance with both the Gateway and the Management licenses: to do so, select Product Evaluation from the Winning the security market menu in PartnerMAP and assign an All-in-Evaluation to your own User Centre account:

**Product Evaluation** Send feedback

**1 of 2 - Select Evaluation Product**

Show details ▾

- ☐ THREAT PREVENTION EVALUATION  
Evaluate all of the Threat Prevention Blades on an existing Gateway
- ☒ ALL-IN-ONE EVALUATION  
Evaluate all of the Gateway and Management Blades on any Gateway
- ☐ OTHER EVALUATION OPTION  
Select a product ⊞  
Select a product from the available options to compare its features

Next ▾

**2 of 2 - Provide Evaluation Info**

User Center Account\*

☒ Select one of your UC Accounts ☐ Type another UC Account ID

checkpoint-0008866168 (Elad Goldenberg) ✕ ▾

IP Address - Optional [learn more](#)

Enter the Management's IP address

Email Address\*

A copy of the evaluation notice will be sent to this Email

Enter an Email address Use my email

Evaluation Product will be used by\*

☒ Check Point ☐ Distributor/Partner ☐ Customer

Purpose of Evaluation\*

Select a purpose ▾

Once the license is in your UC account the license will need to be activated against the IP assigned to the management server. Please all the time use IP address of your management server to avoid any kind of issues.

Fill the license as bellow:

## My Products

### License - Step 1 of 1

Product Name	CPSG-CPSM-EVAL
Certificate Key	19E51F2A0E3E
Description	All-in-one (Security Gateway, Management, all Software Blades)

**I would like this product to operate**

☒ Using the Software Blade Architecture (R70 and above)

☐ Using the NGX Architecture (R65 and below)

#### License Information

Type of License (Central/Local):	Central	?
<b>Select or Enter IP Address</b>	192.168.1.5	?
<b>Hardware Brand Name</b>	Other HW Brand Name	
Other	Other HW Brand Name	
Specify Vendor		
<b>Operating System</b>	Other Operating System	
Specify System

**Note:**

*Use IP address of your management server. IP above is just an example.*

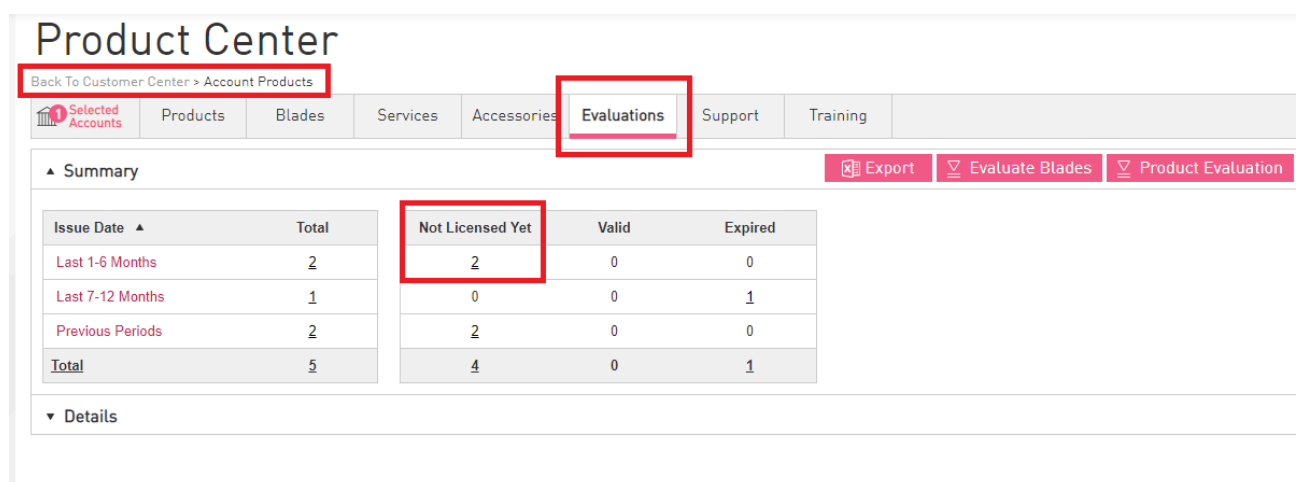

## 1.2. Generate keys from evaluation created by someone else

Go to portal <https://usercenter.checkpoint.com/>

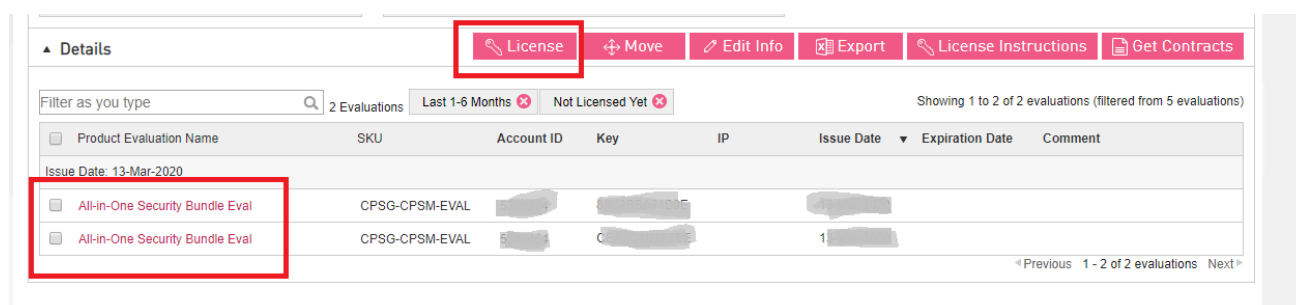

Go to your Account:

And list Eval licenses attached by your Partner or Distri or CP representative

Then proceed to create license keys:

Once the license is in your UC account the license will need to be activated against the IP assigned to the management server. Please all the time use IP address of your management server to avoid any kind of issues.

Fill the license as bellow:

# My Products

## License - Step 1 of 1

Product Name	CPSG-CPSM-EVAL
Certificate Key	19E51F2A0E3E
Description	All-in-one (Security Gateway, Management, all Software Blades)

- I would like this product to operate
- ☒ Using the Software Blade Architecture (R70 and above)
  - ☐ Using the NGX Architecture (R65 and below)

#### Note:

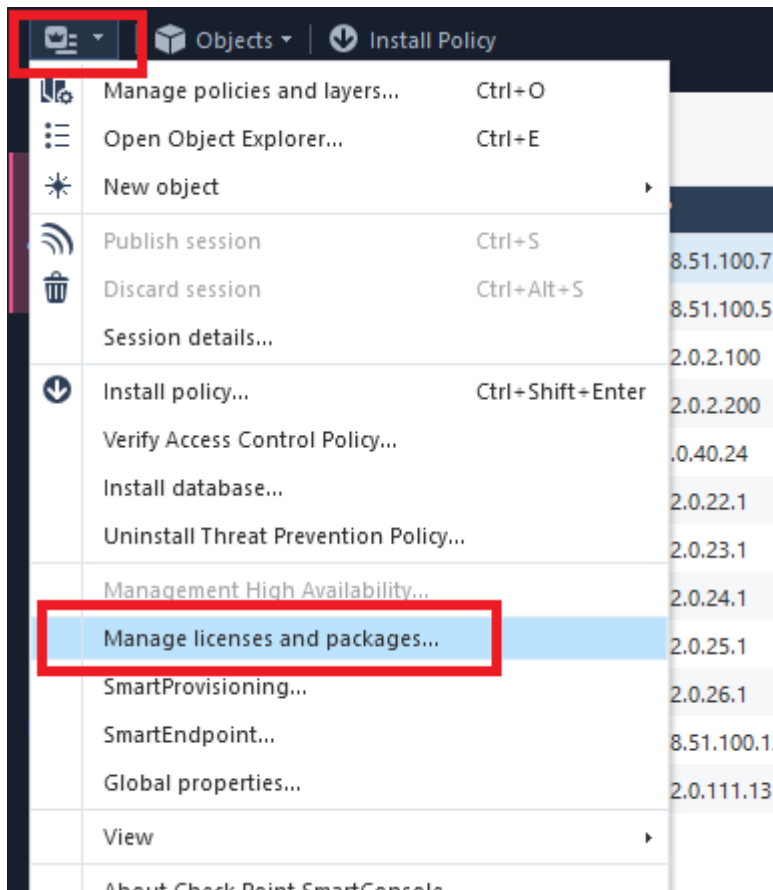

Use IP address of your management server. IP above is just an example.

## 2. Install license keys to management

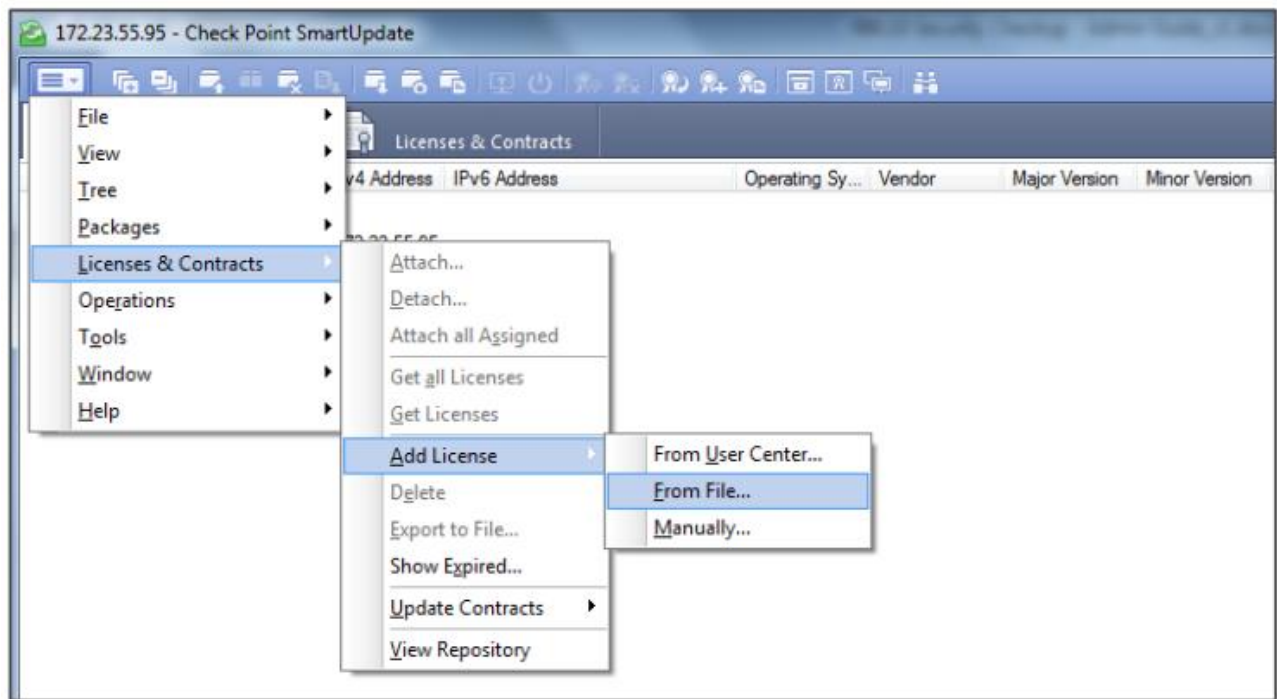

Prerequisites:

- Installed console suitable for management R80.10,20,30

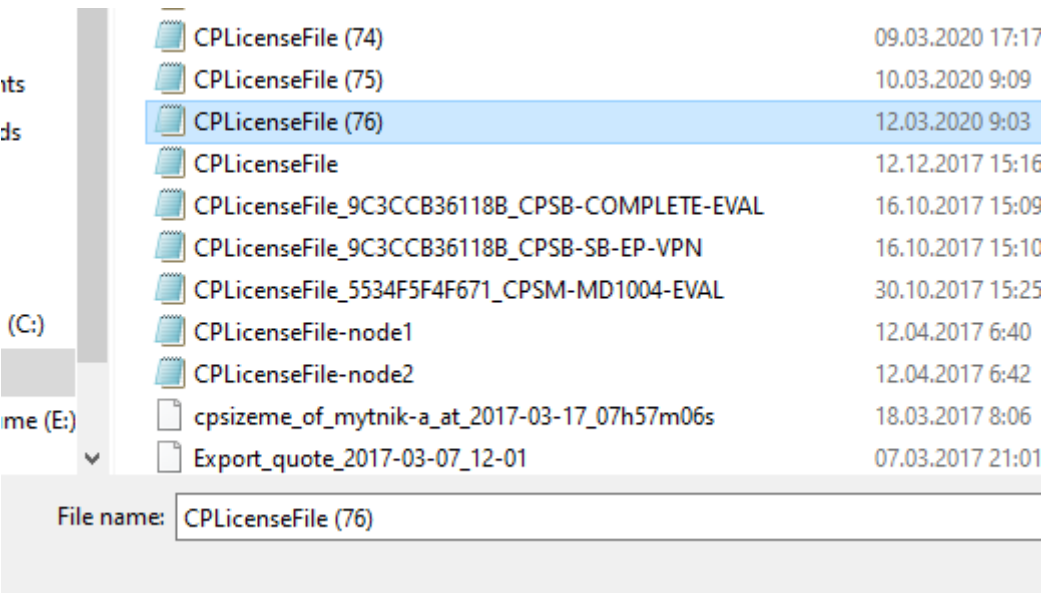

Open security console and list licenses and packages option as follows:

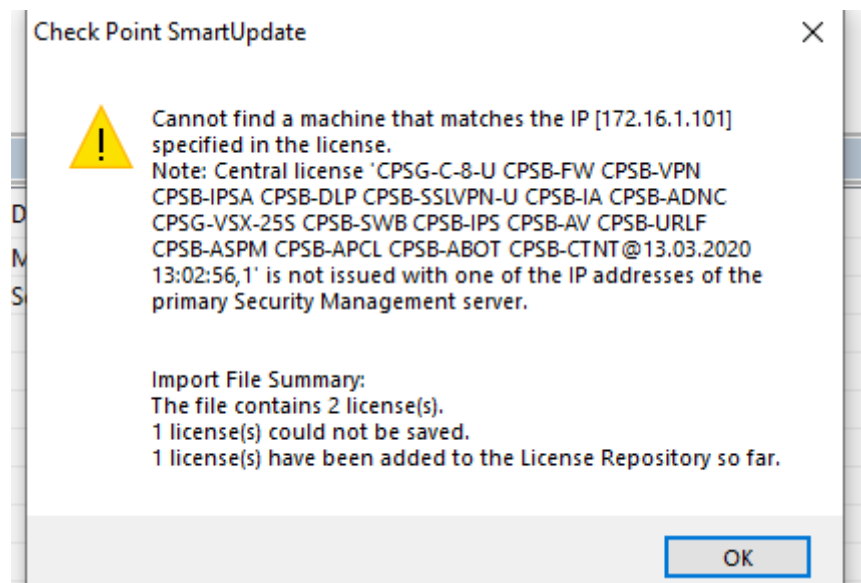

Select License and you will be emailed the licence file, save to disk and install license to the appliance by opening SmartUpdate and add from file (previously generated EVAL keys files obtained from email or from web userportal):

Choose your license key

If license is correctly generated, then you will see following after import the file:

Then the file is correctly stored in the repository.

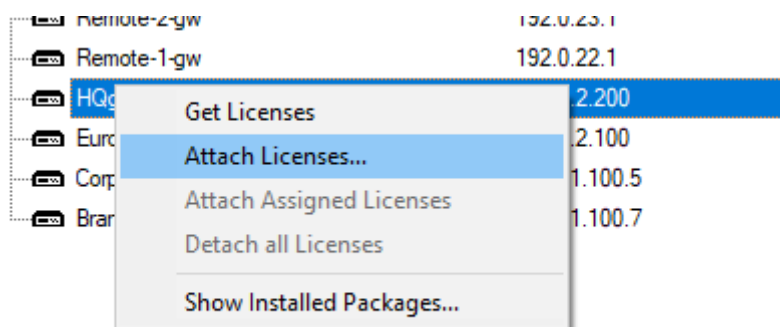

*Note:*

*Sometimes it can be automatically assigned to management machine. You will realize this license as a red marked text on the wrong box. Then you need to detach it and reattach it to correct box. See below chapter 3.*

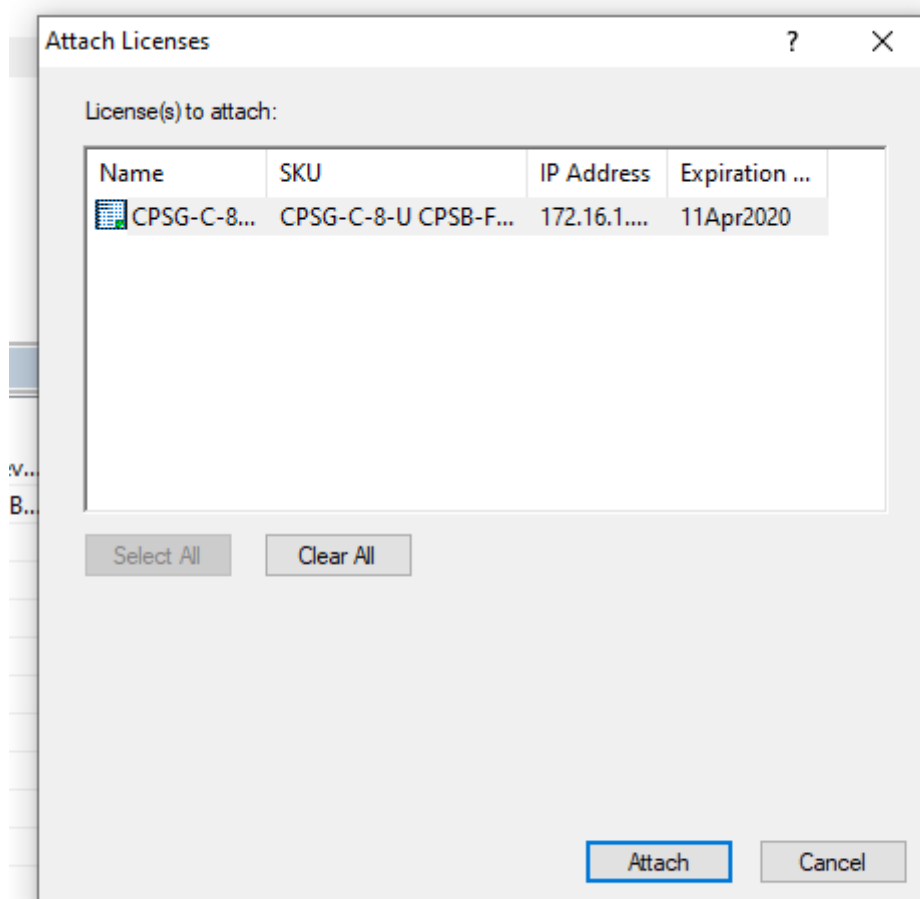

### 3. Attach licenses to correct boxes

You need to attach license to correct box you want to evaluate blade:

Choose gateway you want to attach EVAL license:

Choose your license key you imported in chapter 2.

And click attach button

Do it on all boxes you need to.

#### 4. Notes

- Remember, if you have a cluster, you need to have licenses on all members of the cluster.
- License will shine red, as it is only 30 days long
- Licenses are not additive
- If you have production licenses (bought) do not worry, licenses will not harm them.
- You do not need to attach new contract file, as those licenses are for evaluation purpose.
- No restart or policy installation required
